SCIENCE

Read the questions and do as directed.

1. My mother's kitchen – There are so many things in the kitchen like fruits, vegetables, spices, cereals list is endless. All of them are packed with vitamins, and many other nutrients. Make a collage of any five such things which will boost up your immunity to fight with diseases. Do not include processed or packaged food. Paste the picture of the same or you can draw the picture also. Write two points to explain how it is helpful.

2. I am a dietician – Well it sounds interesting isn't it. Sweets, chocolates, junk food all are so tempting that it's hard to resist but as a science student we now know what is a balanced diet.

Make a diet chart of a healthy breakfast, for yourself for a week . Include nutritional values, ingredients used, time taken to prepare it. (Hey remember to add lots of proteins as you all are growing champs). You can help your mother in the kitchen and express your gratitude towards her.

3. Plant a tree sapling in a pot. Click a picture of yourself while planting. Observe the changes in plant on a weekly basis, maintain a record of your observations. Paste pictures showing comparative growth of plant. Write a note on the values that you inculcated by taking care of a plant.

4. Prepare a working model showing different types of motion

5. Revise chapters *Components of food* and *Motion and Measurement of distances*.
